“No Sacrifices”
INTRODUCTION

When our design team created Tracer Executive, the intent was to build an Ultra Lite travel trailer that was significantly better than the competition.

To accomplish our goal, Tracer went “outside the box” with innovative floorplan designs. We also looked at travel trailers in higher price points and said, “our lite weight minded customers would love this – let’s add it!” To ensure a TOTALLY SATISFYING ownership experience, we implemented extensive testing and quality control standards for Tracer Executive that went beyond what any product of its type will ever experience. And we wanted to make sure that Tracer Executive could still fit into the budget of a first time RV owner, so we were careful to choose the exact components to build a product that was better AND affordable.

The result of our efforts is Tracer Executive– an Ultra Lite travel trailer that makes “No Sacrifices”.

As you look through the following pages, we think you will agree with the hundreds of satisfied Tracer owners on the road and in campgrounds across North America that the Tracer Executive makes “No Sacrifices” in the Ultra Lite weight travel trailer market!

Visit our web site at www.primetimerv.com for more information on additional features and benefits of Tracer Executive – an Ultra Lite weight travel trailer that makes “No Sacrifices”.

“No Sacrifices”
Advantage – SPACIOUS KITCHEN

Tracer’s extended countertop surface, residential sink, hi-rise faucet and creative storage solutions provide the convenience and comfort that you deserve in your “home away from home”.

Advantage – Deep Kitchen Overhead Cabinets That Are Easy To Reach

For maximum storage, Tracer offers deep kitchen overhead cabinets that allow you to take “all things necessary” on your next camping adventure.

Advantage – Spice Rack Valance Storage

At first glance this additional, creative storage area can be overlooked until it is time to put your much needed kitchen items where they belong. Then you will love having a designated spot for spices and other small kitchen items!

“No Sacrifices”
INTERIOR

Advantage – Spacious Kitchen Pantry with Removable Shelves

Abundant storage is complimented with extra convenience by Tracer’s handy removable shelves in the kitchen pantry. (most models).

Advantage – Roller Ball Bearing Full Extension Drawer Guides

All of Tracer’s drawers are 100% accessible thanks to full extension drawer guides. The roller ball bearing design ensures residential ease of use and will support even the heaviest loads.

Advantage – Solid Surface Countertops

Tracer Executive’s “Second Generation” E-Stone countertops are a uniquely engineered product that combines an amazing residential look with lightweight durability specifically designed for use in a Recreation Vehicle. E-Stone is certified to meet strict UL flame spread and impact requirements.

“No Sacrifices”
Advantage – Sink Covers

Great looking sink covers are designed to perfectly fit your sink creating lots of extra work space in the kitchen. Sometimes they are even used to hide dirty dishes when an unexpected guest arrives! 😊

Advantage – Metal, High Arching, Single Lever Kitchen Faucet

In order to maximize the convenience of Tracer’s kitchen sink bowls, a high arching faucet will better allow for cleaning of large pans or help when filling the extra large pitcher of water.

Advantage – Trash Can Friendly

Prime Time knows RV’ing! That’s why we design convenient trash can storage into most Tracer floorplans.

“No Sacrifices”
Advantage – Additional Overhead Cabinets

Additional overhead cabinets are conveniently located directly across from the kitchen.

Advantage – Grand U-Shaped Dinette

Tracer’s Grand U-Shaped Dinette is simply the largest in the Ultra Lite category. Not only does it provide ample room for dining, but the Grand U makes into a GRAND size sleeping area too!

Advantage – Full Depth Slide Rooms

Tracer Executive is light on weight, but heavy on living space. You can choose from several different full depth slide floorplans.

“No Sacrifices”
**Advantage – Slide Room End Windows**

It seems that you can never have enough windows to breathe in the fresh air and let the sunshine in, but at Prime Time we’ve got you covered with windows that open at each end of our deep slide out models!

**Advantage – Large Panoramic Style Windows**

You will love the oversized windows in your new Tracer Executive! This 72” wide dinette window is a customer favorite!

**Advantage – Wardrobe Slide Suite**

Tracer’s 3100 model is “over the top” with great design and function. The hanging wardrobe section has a hinged, flip up shelf so you can use your wardrobe the way that best fits your lifestyle. Wow, look at the (2) DEEP/WIDE drawers in this Lite weight, triple slide model!

“No Sacrifices”
Advantage – Audio/Visual Entertainment Equipment

Your entertainment enjoyment is sure to be satisfied with Tracer’s 26” LCD Flat Screen TV that is complimented by a Jensen Stereo featuring DVD, CD, AM/FM, MP-3 and USB capabilities.

Feature – Armstrong “Tough Guard” Vinyl Flooring

Great looks and durability are assured with Armstrong “Tough Guard” vinyl flooring. Tough Guard comes with a 5 YEAR WEAR WARRANTY and is glued down to prevent cold cracking.

Advantage – “Evergreen” Select Foam Mattress

You will get a great night’s sleep on Tracer’s upgraded “Select Foam” mattress. No cheap, thin foam rubber for you and your back to deal with!

“No Sacrifices”
**INTERIOR**

**Advantage – Pleated Night Shades**

Tracer’s stylish, pleated night shades provide desired privacy, added warmth and beauty to your “home away from home”.

**Advantage – Wooden Pull Out Drawers**

Some lite weights have NO drawers in the entire unit. NOT SO with Tracer- “NO SACRIFICES”.

**Advantage – King Shower**

Tracer boasts of having (2) distinct shapes of KING showers to choose from in its floorplan line up (some models). You will love either the 32”x40” rectangle shown here or the 36” wide neo-angled. Both spacious showers and their large entry door openings will make you feel right at home!

“**No Sacrifices**”
Advantage – Water Retention Dam

The king size shower is specially designed with a unique water retention dam molded into the shower pan. This smart idea will ensure that any pesky water drips run back into the shower instead of onto your floor.

Advantage – “Skyview” Skylight With 6’4” of Expanded Head Room

Whether you’re a tall person or just don’t like to feel “closed in”, you’ll love the added headroom created inside Tracer’s shower by the “Skyview” skylight. It offers an amazing 6’4” of head room.

Advantage – Hi Rise Toilet

Our customers appreciate the comfort and ease of use with Tracer’s Hi Rise toilet and convenient foot flush feature.

“No Sacrifices”
EXTERIOR

Advantage – “One Touch” Electric Awning

Our simple to use “One Touch” Power Awning with adjustable arms on both sides provides the shade you seek and conveniently adjusts to block sun or allow for rain fall drainage in any direction.

Advantage – “One Touch” Electric Stabilizer Jacks

Stop struggling with manual hand - crank jacks and simplify your camping experience with the use of our “One Touch” front and rear Power Stabilizer Jacks.

Advantage – Bus Style Slam Latch Baggage Doors

Tracer is the first ultra lite in its class to use upgraded motor home style baggage doors. These doors offer added security and convenience, are better insulated (notice the weight and thickness), and have an automotive bulb seal - NOT a thin foam tape seal - to keep out water and dirt.

“No Sacrifices”
Advantage – UDC Universal Docking Center

UDC neatly consolidates your hook-ups in a dedicated lighted area eliminating unsightly multiple hook-ups along the sidewall. It also keeps connections protected, heated and locked away from the outside elements.

Feature – “No Mess” Drain Tube

Experienced RV’ers know that you often end up with a wet, muddy mess under your water connections by the end of your trip. Tracer’s UDC is smartly designed to catch the annoying water drips and funnel them down through the drain tube where a simple 5 gallon bucket can be used to collect the water eliminating the giant mud puddle. CAUTION – We do not recommend emptying the full 5 gallon bucket of water on your neighbor’s camp site 😊.

Feature – Dual Satellite/Cable Connections & Black Tank Flush

Inside the UDC, there are separate digital-compatible RG6 coax connections for BOTH cable and satellite. To make dumping your tanks easier, a handy Black Tank Flush connection is also included.

“No Sacrifices”
**Advantage – E-Z Tow Wide Track Suspension**

E-Z Tow improves towability by offering a longer wheelbase and wider wheel stance. The wider stance also allows the trailing tire to remain on level ground while the lead tire is potentially in a pot hole or low spot, thus helping to stabilize your Tracer even further!

**Advantage – Outside Entertainment Center**

Exterior marine grade speakers and TV bracket with cable and power hook-ups allow you to enjoy your entertainment outdoors.

**Advantage – Extended Drip Spouts**

Tracer’s extra long drip spouts will keep the water from running down the side of your trailer and minimize the annoying black streaks that often form on the side of your unit. Go ahead, throw away those clothes pins!

“*No Sacrifices*”
Advantage – Deluxe Quick Recovery Water Heater

The Atwood 6 Gallon Gas/Electric water heater in Tracer is designed to a higher standard, too. This remarkably efficient model recovers water at the rate of 18 gallons/hour!

Advantage – EASY ACCESS Low Point and Fresh Water Drain Valves

No more crawling under your trailer and trying to unscrew awkward cap fittings. With a simple ¼ turn, these easy to reach drain valves allow you to quickly and easily drain your water lines and fresh water tank.

Advantage – LP Quick Connect

Hooking up an LP gas grill or other LP burning appliance is made convenient with the LP Quick Connect fitting that runs to the back of every Tracer.

“No Sacrifices”
EXTERIOR

Advantage – Triple Steps at Entry

Safety and convenience are important to you and Prime Time Manufacturing, that’s why we’ve incorporated triple entry steps where needed!

CONSTRUCTION NOTE: These steps are mounted to the frame (not the floor) for long term durability.

Advantage – Fiberglass Front Cap With Rock Guard Protection

Tracer provides the “best of both worlds” by using a stylish, aerodynamic fiberglass front cap incorporated with a color coordinated, heavy duty rock guard designed to withstand flying road debris.

Advantage – Full Outdoor Kitchen

Tracer’s simulated stone front makes for a stunning residential look. Not only will you be the envy of the campground, but the full kitchen will be a hit at meal time for whoever gets to do the cooking outdoors! (some models)

“No Sacrifices”
CONSTRUCTION

ETERNABOND Construction

ETERNABOND is the name given to Prime Time’s industry leading construction design that combines light weight durability with tremendous insulation and sound deadening properties. Read on to learn more about the advantages of ETERNABOND.

ETERNABOND Advantage – Laminated, Aluminum Sidewalls

Tracer’s aluminum framed sidewalls are 2” thick with four layers:

1. 1/8” interior lauan with vinyl covering
2. 1.5” welded aluminum and EPS Foam
3. 1/8” exterior lauan
4. Gel coated fiberglass

ETERNABOND Advantage – Laminated, Aluminum Rear Wall

Tracer’s rear wall is built with the same aluminum framed, laminated construction as the sidewalls. Most competitors cut corners in this area by offering a non-laminated wall that is typically built out of wood. Test for yourself – if the wall is solid, it’s probably laminated. If the wall is spongy, it’s probably not.

“No Sacrifices”
CONSTRUCTION

ETERNABOND Advantage – Laminated, Aluminum Slide Out End Walls

Just like the end wall, the slide room is typically a place where manufacturers cut corners in construction – not Tracer. The slide out end walls are made with the same aluminum, laminated construction.

ETERNABOND Advantage – Laminated, Aluminum Slide Roofs

Your slide out roof is one of the most critical areas of your RV so Tracer goes the extra mile to assure your complete satisfaction and long term durability. These strong roofs are designed to support hundreds of pounds and can easily be walked on during periodic maintenance or to clean off debris.

ETERNABOND Advantage – Laminated, Aluminum Main Floor

No spongy floors with a Tracer! The five-layer laminated design of the main floor offers unmatched strength and lightweight durability. An extra layer of moisture barrier (black on top in picture) is added to the bottom of the floor for extra protection from the elements.

“No Sacrifices”
ETERNABOND Advantage – Welded Construction

Unlike many of our competitors, Tracer aluminum studs are welded - NOT screwed together - to provide long term strength and durability.

ETERNABOND Advantage – 100% Glue Coverage on All Laminated Parts

Prime Time’s advanced glue applicator provides 100% glue coverage on every sheet of our plywood substrate. The glue is mixed with a special dye that glows “purple” under the fluorescent black light of the applicator that clearly indicates to our production team full coverage is being achieved.

ETERNABOND Advantage – EGS Backers in Walls and Floors

Tracer’s are laminated with electro-galvanized sheet metal backer plates in the walls and floors to provide for strong, secure anchor points for cabinets and interior walls. This picture shows EGS backer above a window that will provide an anchor point for an overhead cabinet.

“No Sacrifices”
Advantage – Powder Coated I-Beam Frames

In order to resist rusting, all Tracer frames are sprayed with a high quality powder coated material.

Advantage – Enclosed Underbelly

Using a lightweight, yet very strong corrugated ABS material, Prime Time completely encloses the underbelly of the Tracer. This protects the vital components in your chassis, provides extra insulation properties, and ensures smooth air flow under the RV during transit.

Advantage – Thermal Package Plus

Tracer’s enclosed underbelly is heated with a 2” heat duct direct vented from your furnace to protect your holding tanks, water lines, and dump valves from the elements during cold weather use.

NOTE: Tracer’s Fresh Water Tank is located in the underbelly and not under your bed.
Advantage – Heavy Duty EPDM Roof

Your long term satisfaction is guaranteed with Tracer’s heavy gauge EPDM roof. Complete with a 12 year warranty this material will resist the annoying chalking and fading that often leads to black run-off marks appearing on the side of your trailer.

Advantage – Walk On Roof With 3/8” Decking

Tracer’s extra strong roof is capable of supporting heavy snow loads or the periodic trip on the roof for inspection and maintenance.

Advantage – Butyl Lined Exterior Moldings and Baggage Doors

You’d be shocked to know that most manufacturers don’t install putty tape under moldings or behind baggage doors – instead they simply seal these areas with a thin bead of exterior silicone. Not Tracer! We go the extra mile to prevent harmful water intrusion.

“No Sacrifices”
Advantage – Solid Wood Core Cabinet Frames Screwed Together

To ensure that the great looking cabinets in a Tracer withstand the test of time, the solid wood core cabinets (not MDF) are pocket-screwed together instead of stapled.

Advantage – Generously Thick Slide Room Floors

Tracer’s engineers have worked tirelessly to produce a lean, Ultra Lite weight travel trailer without sacrificing long term durability and strength. Tracer’s multi-ply, plywood is just one more example of Tracer’s commitment to making “No Sacrifices” to build the best Ultra Lite on the market!

Advantage – PEX Water Lines With High Quality Oetiker Clamp Rings

As part of Prime Time’s exclusive Leak Guard Assurance Process, Tracer is built with durable PEX water lines and Oetiker clamp rings that provide for a 25 year leak-free guarantee. See the video on our web site for more details on Leak Guard.
