

Upholstery Cleaning Instructions

Vinyl Upholstery:

1. Carefully wipe the upholstered piece to remove any dirt or grit.
2. Use a mild dish soap to spot clean using a clean cloth or clean sponge. DO NOT RUB FIRMLY
3. After cleaning, rinse with cool water.
4. Towel dry immediately.

Faux Leather:

1. Use a soft cloth with mild soap and water or a mild dish soap.
2. Rinse the surface with clear water after cleaning.
3. Wash area off with clean warm water to remove any residue

Other Fabric:

1. Mix $\frac{1}{4}$ cup of dish soap with 1 cup of warm water until it creates a thick sudsy foam. (test the solution on a small area before using)
2. Thoroughly wipe the furniture and cushions
3. Start dabbing the solution onto the upholstery with a soft cotton rag. Blot the stained areas continuously until the dirt accumulates in the suds and on the rag.
4. Take a wet washcloth (not drenched) and begin wiping the dirty suds away. Repeat step 3 and 4 until it is clean.
5. Let the upholstery dry completely overnight.
6. Once it's dry, vacuum again to remove any dirt and dust that has been lifted from the cleaning solution.
